ACKNOWLEDGEMENT

"Ethereum Blockchain based Pet's Snap" is the project of many hands from the team. Our tribute for the successful completion of the project goes to all those who helped through their constant guidance and encouragement. The satisfaction that accompanies the success would be incomplete without thanking person who made it.

We are thankful to our beloved Principal **Dr. Y.C KAMALA**, who encourages us to come with new and innovative ideas and for providing the environment with all facilities for completing the project.

We are also grateful to our Head of the Department of Computer Science **Prof. SHALINI.C** and project guide **Prof. Varadaraj R**, lecturer Department of computer science for his valuable guidance and constant support during our project development.

We extend our thanks to all the teaching staff of the department of computer science. Finally, we thank one and all who helped us directly and indirectly with the completion of our project.

Table of Contents

D)	Project Goal (Problem Statement)	
II)	Solution Proposed	1
III)	Input Data and Images	1
V)	Referenced Documents:	1
VI)	Project/ Solution (Pet's Snap) Design	2
VII)	Tools/ Technologies Used	2
IX)	Referenced Documents:	4
X)	Set-up, Compile and deployment of the Project "Pet's Snap" on to Test Ethereum Blockchain "Ganache" using Metamask	5
1)	Setup the Project Folder	5-7
	a) Copy the given Project folder under "c:\user\username" directory and confirm	
	b) Open the Windows Terminal and change over to the Project Folder, list the directory and confirm the availability of Project Files	
	c) Execute the command "npm Install" and verify the availability of "node modules" directory	
2)	Compile and deploy the "Pet's Snap" Project	7-13
	a) Compile the contract files and verify the creation of "build" directory	
	b) Start the Ganache Test Blockchain	
	c) Start and unlock the Metamask Wallet. Select "Ganache Network". Import the first account of Ganache Test Blockchain and confirm	
	d) Deploy the contracts on to Ganache Test Blockchain and verify	
XI)	Start the Dev Server and verify the deployment of the project's frontend on to the default browser of the Windows System	14-16
	1) Start the Dev Server (lite-server)	
	2) Verify the display of the Project's frontend in the Chrome Browser	
XII)	Interactions with the "Pets' Snap" application using the frontend	17-22
	1) Purchase a "Pet" using the currently connected Ethereum Account	
	a) Click on "Purchase" button given under any one of the Pet pictures	
	b) Check on the Metamask account displayed and make sure that your recently imported account is displayed and it is loaded with 100 Ethers	
	c) Now, click on "Purchase" button given under any one of the Pet pictures	
	d) Verify the Metamask Wallet display (like Account Info, Estimated Gas Fee, Total Fees) and then click on "Confirm" button	
	e) Verify that the clicked "Purchase" button is changed to "Success". The Ethereum Account info is displayed under Purchaser	
	f) Verify that the Purchaser's Ethereum account info is captured in the "List of Purchasers"	
	g) Verify the Ganache TX COUNT, Transaction and New Block Creation	
	2) Purchase a second "Pet" with the same Ethereum Account	
	a) Click on "Purchase" button below any of the Pet pictures which has not been purchased so far	

	b) Verify the Metamask Wallet display (like Account Info, Estimated Gas Fee, Total Fees) and then click on "Confirm" button	
	c) Verify that the "Purchase" button has changed into "Success" and the "Purchaser" Account address is getting displayed below the picture of purchased Pet. Also, verify that the Purchaser's Ethereum account info is captured in the "List of Purchasers"	
	d) Verify the Ganache TX COUNT, Transaction and New Block Creation	
	3) Purchase a "Pet" with the another Ethereum Account	
	a) Copy the Private key of the Second Ethereum account in Ganache	
	b) Select the "Ganache Network" in the Metamask, import an account, paste the just copied Private Key and click on "Confirm" button	
	c) Connect the imported account to the "Ganache Test Blockchain and verify	
	d) Click on "Purchase" button given under any one of the Pet pictures which has not been purchased so far	
	e) Click on "Confirm" button in the Metamask	
	f) Verify that the "Purchase" button has changed into "Success" and the current "Purchaser" Account address is getting displayed below the picture of purchased Pet. Also, verify that the Purchaser's Ethereum account info is captured in the "List of Purchasers"	
	g) Verify the Ganache TX COUNT, Transaction and New Block Creation	
XIII)	Project Summary	29
