PROJECT REPORT
ON
HYPERLEDGER FABRIC BLOCKCHAIN BASED FABLAPTOP APPLICATION

BY

LIKITHA S D **19NCJB418**

Under the guidance of

Prof. VARADARAJ.R

FabLaptop project report submitted in partial fulfilment of the requirements of

VI Semester BCA, THE NATIONAL COLLEGE JAYANAGAR

Date of Examination:

ACKNOWLEDGEMENT

FabLaptop Application is the project of many hands from the team. Our tribute for the successful completion of the project goes to all those who helped through their constant guidance and encouragement. The satisfaction that accompanies the success would be incomplete without thanking the person who made it.

We are thankful to our beloved Principal Dr.KAMALA YC, who encourages us to come with new and innovative ideas and for providing the environment with all facilities for completing the project.

We are also grateful to our Head of the Department Prof. SHALINI C, Department of computer science for her valuable guidance and constant support during our project development.

We are also grateful to our project guide Prof. VARADARAJ R, lecturer Department of computer science for his valuable guidance and constant support during our project development.

A special thanks to MUTHURAM GOVINDARASU, CEO and Founder of Indigeneous Tech Private Limited, Bangalore-32 with 10 years of experience in Blockchain for his valuable guidance and technical support for our project.

We extend our thanks to all our teaching staffs of the department of computer science. Finally, we thank one and all who helped us directly and indirectly for the completion of our project.

Table of Contents

I) Project Goal (Problem Statement) 6
II) Solution Proposed 7
III) Input Data and Verification 9
IV) Project/ Solution (FabLaptop) Design 10
V) Tools/ Technologies Used 12
VI) Project Team Members 12
VII) Referenced Documents: 13
VIII) Project / Solution Setup 13
1) Account and EC2 Instance creation and connection 13
a) Create an AWS free account and further create an EC2 instance with Ubuntu Operating System 13
b) Connect to the AWS EC2 Instance through "Putty" Software and open the Terminal. Change over to "root" directory with Admin permissions 13
2) Download the required pre-requisite tools and Software into the EC2 Instance, transfer the "FabLaptop" Project files from Windows System to EC2 Instance using "FileZilla" and setup the project in the EC2 Instance ... 13
a) Download and install all the pre-required tools and software for the Hyperledger Fabric based Blockchain set-up in the created EC2 Instance 14
b) In the EC2 instance, clone the "fabric-samples" directory, download and install the Hyperledger Based Blockchain Binaries Version 1.4.6 and download the Hyperledger based Docker images from Docker hub. 14
c) Transfer these program and files from Windows System to the created AWS EC2 Instance using the "FileZilla" software 14
d) Go to "FabLaptop-network" directory and create Cryptographic based certificates and update the "docker-compose.yaml" file with the relevant CA certificate and save the file 14
e) Create a directory "channel-artifacts" and create genesis.block and channel.tx files under that directory and verify. Covert the "start.sh" file into an executable file 14
f) Go to "FabLaptop" directory and covert the "startFabLaptop.sh" and "teardownFabLaptop.sh" files into executable ones 14
g) Execute the command "npm install" and verify the creation 969of "node_modules" directory 14
IX) Project / Solution Execution 15
1) In the "FabLaptop" directory, execute the command "./StartFabLaptop.sh" command and verify that the Blockchain Network is up and deployed 15
2) Execute the command "node enrollAdmin.js" and verify that the "Admin" is enrolled successfully 18
3) Execute the command "node registerUser.js" and verify that the "user1" is registered and enrolled successfully 18

4) Execute the command "node query-All-Laptops.js" and verify that the all the Laptop data stored inside the blockchain are read and displayed successfully 19

5) Execute the command "node query-Laptop4.js" and verify that the Laptop4 details are read from the blockchain and displayed successfully 19

6) Execute the command "node invoke-Laptop10.js" and check that the Laptop10 has got stored into the blockchain successfully 19

7) Execute the command "node query-Laptop10.js" and check that the Lapop10 data is read from the blockchain and displayed successfully 20

8) Execute the command "node invoke-Laptop10-Owner-change.js" and check that the new owner of Laptop10 has got stored into the blockchain successfully 20

9) Execute the command "node query-Laptop10.js" and check that the Laptop10 data is read from the blockchain and displayed successfully with new Laptop owner 20

X) Setup and loading of "FabLaptop Frontend" 22

1) Open the "/FabLaptop-front/src/App.js" file and update the Public IP address of the FabLaptop EC2 Instance and save the file 22

2) From the "FabLaptop" directory, execute the command "node FabLaptop-backend.js" and verify the display of "Listening on port 4001" 24

3) Create the duplicate session of the EC2 Instance, navigate to "FabLaptop-front" directory in that instance, execute the command "npm run start" and verify the successful starting of the React App Development Server 25

4) Load the "FabLaptop-frontend" onto the Chrome browser by using the url: "http://Public IP of the Instance:3000/ and verify the successful display of the FabLaptop frontend 26

XI) Interaction with the FabLaptop Blockchain Network using FabLaptop Frontend from Windows System Browser 28

1) Click on "QUERY ALL" option and then "SEARCH ALL" button 28

2) Click on QUERY, enter Laptop4 and then click on "SEARCH" button 29

3) Click on CREATE option, enter the new Laptop details and then click on "CREATE" button 30

4) Click on QUERY option, enter Laptop11 and click on "SEARCH" button 31

5) Click on TRANSFER option, enter Laptop11 for LAPTOP ID and Prakash for New Owner and then click on "TRANSFER" button 32

6) Click on QUERY option, enter Laptop11 and click on "SEARCH" button 33

XII) Closing of "FabLaptop" Project 34

XIII) Project Summary 37
