## TO WHOMSOEVER IT MAY CONCERN

Congratulations!

We are happy to say that Mr. Akash Jain has been offered the role of a LEGO Robotics and STEM Educator at RoboLectro STEAM Studio, Bangalore.

The **RoboLectro STEAM Studio (www.robolectro.com)** is a place where students explore STEM (Science, Technology, Engineering and Math) through building hands-on Robotics projects and learning concepts through real world examples.

As part of the internship program, he will be trained in building and coding LEGO Robotics, Electronics, CAD Designing and 3D Printing.

After his training for a week (March last week), he will work as a **LEGO Robotics and STEM Educator**. He will teach 21<sup>st</sup> century skill development courses for children aged 5-16 years in the month of **April and May**.

Through this internship, he will learn the STEM Approach of education. Through LEGO Robotics, he will learn and teach models related Simple Machines, Simple and Complex Mechanisms with coding using LEGO LabView software, Basic Electronics and Arduino.

This experience will surely help him in his career. We look forward to have him as part of our amazing team.

A handwritten signature in black ink that reads "Ashwini Anil".
