## CODE OF ETHICS TO CHECK MALPRACTICES AND PLAGIARISM IN RESEARCH

The main objective is to promote the research and research publications and prevention of misconduct including plagiarism in R&D.

### Introduction

Ethics and plagiarism are the significant components in research and publication. Sometimes it is to be observed that researchers claim other's work as their own, which will degrade the reputation of the individual /Institution. There is every need to assess the academic/research work of the student/research scholar/researcher who produces their work in the form of Project reports, Seminar papers, Research papers, Research proposals, and thesis work. Especially the research work in the form of papers/projects should go through the process of plagiarism and has to maintain high academic and production standards. The research work produced would be thoroughly assessed for their viability across the globe and needs to reach the highest success. We take some extra measures to ensure that the work is at par with the National/International standards of professional typesetters who are engaged to bring about the best of results. The Authors are made responsible for their research work carried out, presentation and results are expressed. The institution deplores and rejects the violation of the code of ethics which is dishonest and immoral infringing the copyright act of intellectual property rights.
