Dear Professor

It is with great pleasure that I inform you that the Semester IV at St. Joseph's (Autonomous) College, PG Section will be coming to a completion shortly. You've been an important part of our activities by guiding our students with their project for nearly a year's time. I take this opportunity to thank you for the help you have extended to St. Joseph's and appreciate all the kindness that you've shown us.

As you were the supervisor to **Deepak Raja S (20PHY04)** and **Mathew J Mathews (20PHY15)** project, we will require one more help from you in the form of grading them.

The total grade is for 100 points of which **50 points** is delegated for internal work and will be graded by **you** (the various heads each carrying 10 points can be: Passion, Hard work/commitment, Understanding/cognition, Communication, Regularity of meeting you/meeting the deadlines you have imposed - these heads are loose and perhaps merge between themselves; please feel free to alter them as you deem fit).

The balance of 50 points will be external and be graded by us at the Department of Physics, St. Joseph's college. These grades will go for their project presentations.

**You are cordially invited to our department for the Project Presentation event.** The event is scheduled for the **4<sup>th</sup> of August 2022, 10:00 am**. The presentations will go on **till 4:00 PM** and refreshments and lunch will be provided.

**Please confirm your presence by 1<sup>st</sup> of August, 2022 midday so we can make arrangements for the food.**

Thanks, and regards

## ACKNOWLEDGEMENT

CBFTIG Application is the project of many hands from the team. Our tribute for the successful completion of the project goes to all those who helped through their constant guidance and encouragement. The satisfaction that accompanies the success would be incomplete without thanking the person who made it.

I am thankful to our beloved Principal **Dr.B SURESHA**, who encourages us to come with new and innovative ideas and for providing the environment with all facilities for completing the project.

I am are also grateful to our Head of the Department **Prof. ASHA TS** Department of computer science for her valuable guidance and constant support during our project development.

I am are also grateful to our project guide **Prof. VARADARAJ**, lecturer Department of computer science for his valuable guidance and constant support during our project development.

A special thanks to **MUTHURAM GOVINDARASU**, CEO and Founder of Indigeneous Tech Private Limited, Bangalore-32 with 10 years of experience in Blockchain for his valuable guidance and technical support for our project.

I extend our thanks to all our teaching staffs of the department of computer science. Finally, we thank one and all who helped us directly and indirectly for the completion of our project.

<b>VII</b>	<b>Referenced Documents</b> .....	18
<b>VIII</b>	<b>Project / Solution Setup</b> .....	18
1)	<b>AWS free-tier Account and EC2 Instance creation and connection</b> .....	18
a)	Create an AWS free-tier account and further create an EC2 instance with Ubuntu Operating System AMI .....	18
b)	Connect to the AWS EC2 Instance through "PuTTY" Software and open the Terminal. Change over to "root" directory with Admin permissions .....	18
2)	<b>Download the required pre-requisite tools and Software into the EC2 Instance, transfer the "CBFTIG" Project files from Windows System to EC2 Instance using "FileZilla" and setup the project in the EC2 Instance</b> .....	18
a)	Download and install all the pre-required tools and software for the Hyperledger Fabric based Blockchain set-up in the created EC2 Instance.....	19
b)	In the EC2 instance, clone the "fabric-samples" directory, download and install the Hyperledger Based Blockchain Binaries Version 1.4.6 and download the Hyperledger based Docker images from Docker hub.....	19
c)	Transfer these program and files from Windows System to the created AWS EC2 Instance using the "FileZilla" software .....	19
d)	Go to "CBFTIG-network" directory and create Cryptographic based certificates and update the "docker-compose.yaml" file with the relevant CA certificate and save the file 19	
e)	Create a directory "channel-artifacts" and create genesis.block and channel.tx files under that directory and verify. Covert the "start.sh" file into an executable file .....	19
f)	Go to "CBFTIG" directory and covert the "startCBFTIG.sh" and "teardownCBFTIG.sh" files into executable ones.....	19
g)	Execute the command "npm install" and verify the creation of "node_modules" directory.....	19
<b>IX</b>	<b>Project / Solution Execution</b> .....	20
1)	In the "CBFTIG" directory, execute the command "./startCBFTIG.sh" command and verify that the Blockchain Network is up and deployed .....	20
2)	Verify that all the required docker containers are up and running.....	21
3)	Enroll the "Admin" into Blockchain Network executing the "enrollAdmin.js" file	22
4)	Register "User1" into the Blockchain Network executing the "registerUser.js" file	22

5) Query and list all the records (Bank , Customer and Forex records) that have got instantiated into the Blockchain by the Smart contract “banks.go” using “queryAll\_Data.js” file.....23

6) Query the specified Bank record and verify .....23

7) Query the specified Customer record and verify .....24

8) Query the specified Forex record and verify .....24

9) Add a new Bank record into the Blockchain then query the created record and verify it.....24

10) Add a new Customer data into the Blockchain and then query that record and verify it.....25

11) Add a new Forex rate data into the Blockchain and then query that record and verify it.....26

2) Pay the Customer US\_John\_Doe\_123 with 1000 EURO units from Customer EU\_Marcos\_999 and verify .....26

3) Query and Verify the Customers (EU\_Marcos\_999 and US\_John\_Doe\_123) data and note down their new account balances and verify.....27

4) Query the current reserves of Japanese\_Bank and UK\_Bank in the Blockchain ....28

**X) Setup and loading of “CBFTIG Frontend” ..... 29**

1) Open the “/CBFTW-front/src/App.js” file and update the Public IP address of the CBFTW Project EC2 Instance and save the file .....29

2) From the “CBFTW” directory, execute the command “node CBFTW-backend.js” and verify the display of “Listening on port 4001” .....32

3) Create a duplicate session of the EC2 Instance, navigate to “CBFTW-front” directory in that instance, execute the command “npm run start” and verify the successful starting of the React App Development Server.....32

4) Load the “CBFTW-frontend” onto the Chrome browser by using the url: “http://Public IP of the Instance:3000/” and verify the successful display of the CBFTW Application frontend .....35

**XI) Interaction with the CBFTIG Blockchain Network using CBFTW Frontend ..... 36**

1) Click on “QUERY ALL” option and then “SEARCH ALL” button. Verify the display of all the available data under “Info” window.....36

2) Query an existing Bank and verify: Click on QUERY, enter “US\_Bank” then click on “SEARCH” button .....37

3) Query an existing Customer and verify the data: Click on QUERY, enter “US\_Alice\_456” then click on “SEARCH” button .....38

4) Query an existing Forex Pair and verify the value: Click on QUERY, enter “USD:JPY” then click on “SEARCH” button .....39

5) Create a new Customer: Click on the CREATE CUSTOMER option, enter the new Customer details and then click on “CREATE CUSTOMER” button.....40

6) Query the created Customer and verify: Click on the QUERY option, enter the created Customer details and then click on “SEARCH” button .....41

7) Create a new Bank : Click on the CREATE BANK option, enter the new Bank details and then click on “CREATE BANK” button .....41

**Project Goal (Problem Statement)**

To design, develop, implement and verify the Hyperledger Fabric based block chain application having the following features:

- 1) Query from the Job' data that is available as part of the Blockchain (Reading bulk data from the Blockchain)
- 2) Query any one of the Job' data that is available as part of the Blockchain (Reading individual record or data from the Blockchain)
- 3) Add a new Job data and verify that it gets added successfully into the Blockchain (Writing a new record into the blockchain and its verification)
- 4) Change the Status of existing Job data and verify (Changing [means creating new record as no modification of existing record is allowed in Blockchain] the existing data in the blockchain and its verification)
- 5) Modify the Status of the existing Job data and verify (Modifying the existing data in the blockchain and its verification). Here, also a new record is created with new owner Name and the existing record is not getting modified which is one of the main feature of Blockchain technology

**Note:** These verifications need to be done both in Command Line Interface (CLI) mode and also using browser based front-end mode.

## Solution Proposed

- 1) We will design, develop, implement and verify the Hyperledger Fabric based Blockchain network namely "Job Appointment Status Application" in an Ubuntu O/S based EC2 Instance in AWS.
- 2) We will write the required Blockchain configuration and other files so as to bring-up the Blockchain network
- 3) We will write a Golang program namely "fabjob.go" in which we will implement the main logic of the Solution.
- 4) In the fabjob.go program, we will design the Job data with the Name,Status,Sex,Designation etc..

```

$ go run main.go
INFO [02/02/2023 10:10:10 AM] Successfully loaded user data from database
INFO [02/02/2023 10:10:10 AM] User data loaded successfully

INFO [02/02/2023 10:10:10 AM] User data loaded successfully

```

- 5) The program will have 10 Job data which will initialize the Blockchain on the starting of the Blockchain

```

$ go run main.go

```

- 6) In the program, we will create the functions queryJob, initLedger, createJob, queryAllJobs and changeJobStatus to meet the Solution requirements.

```

```

- Also, we will create relevant JavaScript files to interact with the established Blockchain network in CLI mode, so as to meet the solution requirements.
- 1) We will create the required Shell script files so as to automate the starting and closing of the Blockchain network.
  - 2) We will also create a frontend (React App based) for the solution so that you can interact with the Blockchain network from your Windows system.

## **ACKNOWLEDGEMENT**

Job Appointment Status Application is the project of many hands from the team. Our tribute for the successful completion of the project goes to all those who helped through their constant guidance and encouragement. The satisfaction that accompanies the success would be incomplete without thanking the person who made it.

We are thankful to our beloved Principal DR.B.SURESHA, who encourages us to come with new and innovative ideas and for providing the environment with all facilities for completing the project.

We are also grateful to our Head of the Department Prof. TS ASHA Department of computer science for her valuable guidance and constant support during our project development.

We are also grateful to our project guide Prof. VARADARAJ, lecturer Department of computer science for her valuable guidance and constant support during our project development.

A special thanks to **MUTHURAM GOVINDARASU**, CEO and Founder of Indigeneous Tech Private Limited, Bangalore-32 with 10 years of experience in Blockchain for his valuable guidance and technical support for our project.

We extend our thanks to all our teaching staffs of the department of computer science. Finally, we thank one and all who helped us directly and indirectly for the completion of our project.

## **I) Project Goal (Problem Statement)**

To design, develop, implement and verify the Hyperledger Fabric based Block chain application having the following features:

- 1) Query from the Job' data that is available as part of the Blockchain (Reading bulk data from the Blockchain)
- 2) Query any one of the Job' data that is available as part of the Blockchain (Reading individual record or data from the Blockchain)
- 3) Add a new Job data and verify that it gets added successfully into the Blockchain (Writing a new record into the blockchain and its verification)
- 4) Change the Status of existing Job data and verify (Changing [means creating new record as no modification of existing record is allowed in Blockchain] the existing data in the blockchain and its verification)
- 5) Modify the Status of the existing Job data and verify (Modifying the existing data in the blockchain and its verification). Here, also a new record is created with new owner Name and the existing record is not getting modified which is one of the main feature of Blockchain technology

**Note:** These verifications need to be done both in Command Line Interface (CLI) mode and also using browser based front-end mode.

- 7) Also, we will create relevant JavaScript files to interact with the established Blockchain network in CLI mode, so as to meet the solution requirements.
- 8) We will create the required Shell script files so as to automate the starting and closing of the Blockchain network.
- 9) We will also create a frontend (React App based) for the solution so that you can interact with the Blockchain network from your Windows system.

### III) Input Data and Verification

Sl.No.	Car ID	Make	Model	Colour	Owner	Remarks	Program Used
Initial 10 Cars' records to be updated in "fabcar.go" program							
1	CAR0	Toyota	Prius	blue	Tomoko	These 10 Cars' records data will get stored in a block of the Blockchain on starting of the Blockchain	fabcar.go
2	CAR1	Ford	Mustang	red	Brad		
3	CAR2	Hyundai	Tucson	green	Jin Soo		
4	CAR3	Volkswagen	Passat	yellow	Max		
5	CAR4	Tesla	S	black	Adriana		
6	CAR5	Peugeot	205	purple	Michel		
7	CAR6	Chery	S22L	white	Aarav		
8	CAR7	Fiat	Punto	violet	Pari		
9	CAR8	Tata	Nano	indigo	Valeria		
10	CAR9	Holden	Barina	brown	Shotaro		
Query and display all the 10 records stored in the block of the Blockchain in CLI Mode						Read and display of stored bulk records from Blockchain	query-All-Cars.js
Query the Car Record, having Car ID as CAR4 and display it in CLI Mode						Read and display of a single Car record (CAR4) from Blockchain	query-CAR4.js
Creation of New Car Record in the Blockchain using JavaScript File in CLI Mode						Creation of new Car (CAR10) record in a block of the Blockchain	invoke-CAR10.js
11	CAR10	Honda	Accord	Black	Tom	Read and verify the successful creation of the New Car (CAR10) record	query-CAR10.js
Verification of the created New Record in the Blockchain using JavaScript File in CLI Mode							
11	CAR10	Honda	Accord	Black	Tom	Modify the existing blockchain record (Here, the existing record is immutable). So, a new record will be created in the Blockchain reflecting the change	invoke-CAR10-Owner-change.js
Change of Owner of the Car (CAR10) using JavaScript File in CLI Mode							
11	CAR10	Honda	Accord	Black	Nike		
Query and verification of (CAR10) data with changed Owner name using JavaScript File in CLI Mode							
11	CAR10	Honda	Accord	Black	Nike	Creation of new Car (CAR11) record in a block of the Blockchain	Using frontend
Creation and verification of New Car (CAR11) record using Frontend							
12	CAR11	Mahindra	XUV500	Silver	Ramu	Read and verify the successful creation of the New Car (CAR11) record	Using frontend
Change and verification of changed Owner of Car (CAR11) using Frontend							
12	CAR11	Mahindra	XUV500	Silver	Prakash		

### High Level:

- 1) Create the following in the EC2 Instance of an AWS Account:
  - a) Golang program with required data and functions
  - b) FabJob Blockchain basic configuration files
  - c) Required Shell Script files
  - d) CLI based JavaScript files in the EC2 Instance
  - e) Middleware JavaScript file for the frontend interaction
  - f) React App based frontend files
- 2) Download and install the following in your Windows System:
  - a) PuTTY.exe along with PuTTYgen
  - b) Filezilla software tool

### Details:

- 1) Write a goLang program namely "fabJob.go" with the below given info:
  - a) Job Data Structure (make, model, colour, owner)
  - b) Functions (queryJob, createJob, queryAllJobs, changeJobStatus)
  - c) Data for 10 Jobs
- 2) Write the below given basic Hyperledger Fabric Blockchain configuration files
  - a) crypto-config.html
  - b) configtx.html
  - c) docker-compose.html
- 3) Write the below given JavaScript application files
  - a) enrollAdmin.js
  - b) registerUser.js
  - c) query-All-Jobs.js
  - d) query-Job4.js
  - e) invoke-Job10.js
  - f) query-Job10.js
  - g) invoke-Job10-Status-change.js
- 4) Write the below given Shell script files
  - a) start.sh
  - b) startFabJob.sh
  - c) teardownFabJob.sh
- 5) Write the middleware JavaScript file namely "fabjob-backend.js"
- 6) Create the required React App based frontend files

**Note: Organise these files as given in the below given directory structure. We need to transfer this folder to the EC2 Instance using "Filezilla" tool**

#### V) Tools/ Technologies Used

- AWS EC2 Instance: AWS EC2 Instance with O/S Ubuntu AMI
- Nodejs and NPM
- Golang
- Docker Container and Docker Compose
- Hyperledger Fabric based Blockchain Binaries Version 1.4.6
- Hyperledger based Docker Images
- JavaScript
- Shellscript
- React App

#### VI) Project Team Member

- 3) **Appendix-C: 04-List-of-Programs-and-Files-Used-in-FabJob-Project-25-Aug-2022.docx**

**VII) Project / Solution Setup**

- 1) **Account and EC2 Instance creation and connection**
  - a) **Create an AWS free account and further create an EC2 instance with Ubuntu Operating System**
  - b) **Connect to the AWS EC2 Instance through "Putty" Software and open the Terminal. Change over to "root" directory with Admin permissions**

**(For the above given Steps-1 and 2, please refer the Document at "Appendix-A" to this report)**

- 2) Download the required pre-requisite tools and Software into the EC2 Instance, transfer the "FabJob" Project files from Windows System to EC2 Instance using "FileZilla" and setup the project in the EC2 Instance
- Download and install all the pre-required tools and software for the Hyperledger Fabric based Blockchain set-up in the created EC2 Instance
  - In the EC2 Instance, clone the "fabric-samples" directory, download and install the Hyperledger Based Blockchain Binaries Version 1.4.6 and download the Hyperledger based Docker images from Docker hub.
  - Transfer these program and files from Windows System to the created AWS EC2 Instance using the "FileZilla" software
  - Go to "FabJob-network" directory and create Cryptographic based certificates and update the "docker-compose.yaml" file with the relevant CA certificate and save the file
  - Create a directory "channel-artifacts" and create genesis.block and channel.tx files under that directory and verify. Convert the "start.sh" file into an executable file
  - Go to "FabJob" directory and convert the "startFabJob.sh" and "teardownFabJob.sh" files into executable ones
  - Execute the command "npm install" and verify the creation of "node\_modules" directory

(For the above given Steps-a to g, please refer the Document at "Appendix-B" to this report)

(For referring to the Programs used in this project, please refer the Document at "Appendix-C" to this report)

### **NIProject / Solution Execution**

- In the "FabJob" directory, execute the command "./StartFabJob.sh" command and verify that the Blockchain Network is up and deployed

## ACKNOWLEDGEMENT

Television Purchase Shop Application is the project of many hands from the team. Our tribute for the successful completion of the project goes to all those who helped through their constant guidance and encouragement. The satisfaction that accompanies the success would be incomplete without thanking the person who made it.

We are thankful to our beloved Principal **Dr.B.SURESHA**, who encourages us to come with new and innovative ideas and for providing the environment with all facilities for completing the project.

We are also grateful to our Head of the Department **Prof. ASHA T S** Department of computer science for her valuable guidance and constant support during our project development.

We are also grateful to our project guide **Prof. VARADARAJ.R**, lecturer Department of computer science for his valuable guidance and constant support during our project development.

A special thanks to **MUTHURAM GOVINDARASU**, CEO and Founder of Indigeneous Tech Private Limited, Bangalore-32 with 10 years of experience in Blockchain for his valuable guidance and technical support for our project.

We extend our thanks to all our teaching staffs of the department of computer science. Finally, we thank one and all who helped us directly and indirectly for the completion of our project.

## ABSTRACT

Purpose of this project is to design, develop and demonstrate the usage of TELEVISION PURCHASE SHOP using ETHEREUM BLOCKCHAIN having the following features:

- Download and install "METAMASK" wallet as the extension of chrome browser
- Download and install the latest version of "GANACHE ETHEREUM TEST BLOCKCHAIN"
- Link the "METAMASK" to the "first account" of the "GANACHE TEST ETHEREUM BLOCKCHAIN" and verify the quantity of ether available in Metamask's account
- Download and install NodeJS for Windows Platform 20
- Verify the successful installation of "NodeJS" and "npm" through Windows terminal (using "cmd" command)
- Install Truffle through Windows terminal and verify its version after installation
- Download and Install "Visual Studio code" editor and verify
- After setting Up the Environment ,Compile,Migrate and Test METAMASK,GANACHE,NODEJS,TRUFFLE,VISUAL STUDIO CODE in windows platform and Run the Project
- Display the front-end on the default Browser with available Pets for Purchase in the Shop
- Purchase a Pet by clicking on the "Purchase" button
- Metamask should be able to calculate the transaction fees for storing the purchase transaction in the Ganache Blockchain
- Ganache should record the purchase transaction and it should be verifiable
- Pet once purchased should not have the option of purchasing again
- Using one Ganache Ethereum Account the Account holder should be able to purchase more than one Pet
- Using different Ganache Ethereum accounts, the account holder should be able to purchase Pets and verify the related transactions in Ganache

XIII) Project Summary .....	52

## I) Project Goal (Problem Statement)

To design, develop and verify the Hyperledger Fabric based Blockchain application namely "CBFTW Application" having the following features:

- 1) Query from the Banks Network's data that is available as part of the Blockchain (Reading bulk data from the Blockchain)
- 2) Query any one of the Banks Network's data that is available as part of the Blockchain (Reading individual record or data from the Blockchain)
- 3) Add a new Bank, Customer, Forex Value data and verify that these values get added successfully into the Blockchain (Writing new records into the blockchain and its verification)
- 4) Pay from any one of the Banks' Customer Account to any other Bank's Customer Account across the available Banks in the network effectively using the applicable Forex rates without any Third-party involvement (Cross Border Funds Transfer across the World (CBFTW)). Further verifying the successful transfer of the fund across the Customer accounts.

Note: These verifications need to be done both in Command Line Interface (CLI) mode and also using browser based front-end mode.

## II) Solution Proposed

- 1) We will design, develop, implement and verify the Hyperledger Fabric based Blockchain network namely "CBFTW Application" in an Ubuntu O/S based EC2 Instance in AWS.
- 2) We will write the required Blockchain configuration and other files so as to bring-up the Blockchain network
- 3) We will write a Golang program namely "banks.go" in which we will implement the main logic of the Solution.
- 4) In the banks.go program, we will design the below given Data structures:

- Download and install "METAMASK" wallet as the extension of chrome browser.
- Download and install the latest version of "GANACHE ETHEREUM TEST BLOCKCHAIN"
- Link the "METAMASK" to the "first account" of the "GANACHE TEST ETHEREUM BLOCKCHAIN" and verify the quantity of ether available in Metamask's account
- Download and install NodeJS for Windows Platform20
- Verify the successful installation of "NodeJS" and "npm" through Windows terminal (using "cmd" command)
- Install Truffle through Windows terminal and verify its version after installation.
- Download and Install "Visual Studio code" editor and verify
- After setting Up the Environment Compile, Migrate and Test METAMASK, GANACHE, NODEJS, TRUFFLE, VISUAL STUDIO CODE in windows platform and Run the Project
- Display the front-end on the default Browser of the Voting application for company Board Resolution.
- Create a voting for company board resolution.
- Metamask should be able to calculate the transaction fees for creating a voting campaign and registration of voters.

- Ganache should record the registered voters' transaction and it should be verifiable.
- Using one Ganache Ethereum Account voter once voted should not be able to Vote again.
- Using different Ganache Ethereum accounts, the account holder should be able to vote for their candidate and verify the related transactions in Ganache.

## I) Project Goal (Problem Statement)

To design, develop and verify the "eVoting for Aircraft Design Approval Application" having the following features:

- a) Display the front-end of the Application on the default Browser.
- b) Setup the "Admin" related info and start the eVoting process.
- c) Add 3 Designs for eVoting.
- d) Register 4 Voters.
- e) As an "Admin" approve all the 4 Voters.
- f) Perform eVoting for Aircraft using 4 Voters account.
- g) As an "Admin" close the eVoting Process.
- h) Verify the result of eVoting.

## II) Solution Proposed

We will design, develop, implement and verify the Ethereum Blockchain based solution namely "eVoting for Aircraft Application" which will be executed in a Windows System. The proposed Solution will meet all the features specified in the Problem statement.

### II) Input Data

SLNO	Design Names	Voting Symbol
1.	Deccan Aviation	Aircraft Design 01
2.	Matrix Aviation	Aircraft Design 02
3.	Blue Sky Aviation	Aircraft Design 03

### III) Project Team Members:

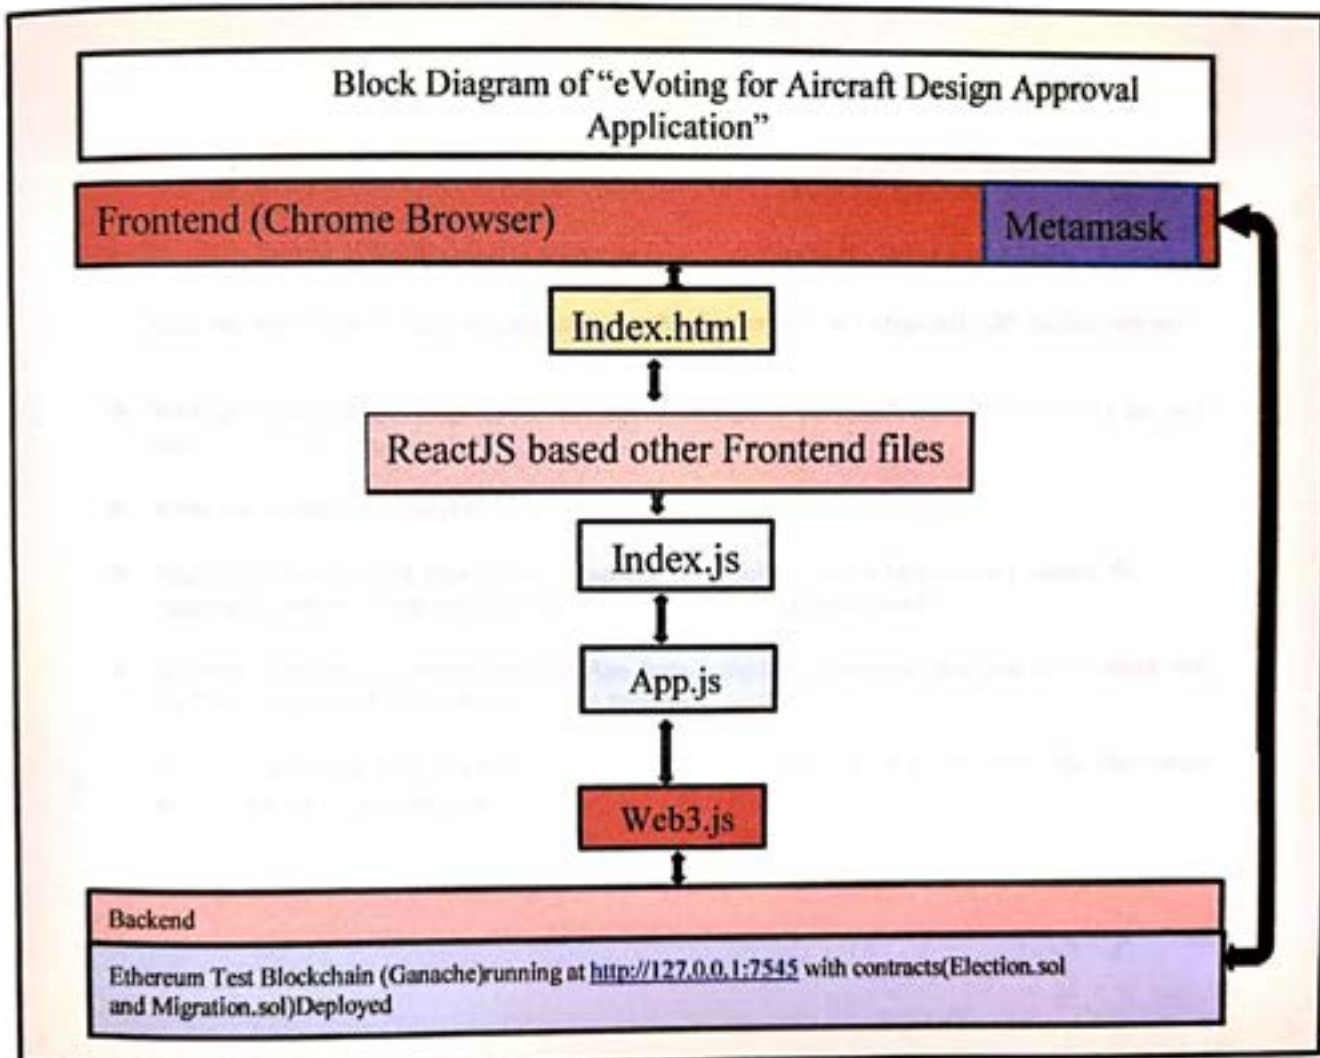

- Rohit V (20NCJB421)
- Varun K (20NCJB431)
- Vivek Kumar A (20NCJB452)

#### V) Project/ Solution (eVoting for Aircraft Application) Design

## **High Level:**

Create / provide the following in the Windows System:

- Create and set the Ethereum Blockchain environment in the Windows system.
- Create the Project folders and files using "Truffle" in the Windows System.
- Write the Solidity program "Election.sol" capturing the main logic of the solution.
- Write the required frontend, middleware and other required files for the solution.

## **Details:**

- ❖ Set-up the Ethereum Blockchain environment in the Windows System by installing NodeJS, NPM, Truffle, Ganache and Metamask  
**(For the above given Step (a), please refer the Document at "Appendix-A" to this report)**
- ❖ By using Truffle, setup the project folder and required files in the Windows System.  
**(For the above given Step (b), please refer the Document at "Appendix-B" to this report)**
- ❖ Write a Solidity language program namely "Evoting.sol" in which we will implement the main logic of the Solution.
- ❖ Write the middleware program using JavaScript and Web3.js
- ❖ Start the Ethereum Test Blockchain "Ganache" and sign-in to the Metamask. Connect the Metamask with the Ganache Test Blockchain by importing an account
- ❖ We will also create a frontend (React App based) for the solution so that you can interact with the Blockchain application through your browser.  
**(For the list along with content of programs used in the project, please refer the Document at "Appendix-C" to this report)**

## VI) Tools/ Technologies Used

### a) List of Tools and Technologies

- O/S: Windows 10
- Browser: Chrome Browser
- Nodejs and NPM
- Truffle
- Ganache (Ethereum Test Blockchain)
- Metamask
- HTML
- CSS
- JavaScript
- Web3.js
- Front-end Tools:
- HTML, CSS
- ReactJS

### b) Backend:

- Ethereum based Test Blockchain linked with Metamask

### c) Middleware:

- JavaScript with Web3.js

## VII) Install the Tools required for the Ethereum Based Blockchain Project in Windows System

(For the detailed instructions, please refer "Appendix-A" document of this Project Report)

## VIII) Setup the Ethereum Blockchain based Project "eVoting for Aircraft Design Approval Application" in the Windows System

(For the detailed instructions, please refer "Appendix-B" document of this Project Report)

## ACKNOWLEDGEMENT

Pet's' Adoption Application is the project of many hands from the team. Our tribute for the successful completion of the project goes to all those who helped through their constant guidance and encouragement. The satisfaction that accompanies the success would be incomplete without thanking the person who made it.

We are thankful to our beloved Principal **Dr.B SURESHA**, who encourages us to come with new and innovative ideas and for providing the environment with all facilities for completing the project.

We are also grateful to our Head of the Department **Prof. ASHA TS** Department of computer science for her valuable guidance and constant support during our project development.

We are also grateful to our project guide **Prof. VARADARAJ R**, lecturer Department of computer science for his valuable guidance and constant support during our project development.

A special thanks to **MUTHURAM GOVINDARASU**, CEO and Founder of Indigeneous Tech Private Limited, Bangalore-32 with 10 years of experience in Blockchain for his valuable guidance and technical support for our project.

We extend our thanks to all our teaching staffs of the department of computer science. Finally, we thank one and all who helped us directly and indirectly for the completion of our project.

	a) Click on "Adoption" button given under any one of the Pet pictures	25
	b) Check on the Metamask account displayed and make sure that your recently imported account is displayed and it is loaded with 100 Ethers	26
	c) Now, click on "Adoption" button given under any one of the Pet pictures	31
	d) Verify the Metamask Wallet display (like Account Info, Estimated Gas Fee, Total Fees) and then click on "Confirm" button	31
	e) Verify that the clicked "Adoption" button is changed to "Success". The Ethereum Account info is displayed under Adoption	32

f) Verify that the Adoptionr's Ethereum account info is captured in the "List of Adoptionrs" .....	33
g) Verify the Ganache TX COUNT, Transaction and New Block Creation....	33
2) Adoption a second "Pet" with the same Ethereum Account.....	35
a) Click on "Adoption" button below any of the Pet pictures which has not been Adoptiond so far.....	35
b) Verify the Metamask Wallet display (like Account Info, Estimated Gas Fee, Total Fees) and then click on "Confirm" button .....	36
c) Verify that the "Adoption" button has changed into "Success" and the "Adoptionr" Account address is getting displayed below the picture of Adoptiond Pet. Also, verify that the Adoptionr's Ethereum account info is captured in the "List of Adoptionrs".....	37
d) Verify the Ganache TX COUNT, Transaction and New Block Creation....	38
3) Adoption a "Pet" with the another Ethereum Account .....	39
a) Copy the Private key of the Second Ethereum account in Ganache .....	39
b) Select the "Ganache Network" in the Metamask, import an account, paste the just copied Private Key and click on "Confirm" button.....	40
c) Connect the imported account to the "Ganache Test Blockchain and verify.....	43
d) Click on "Adoption" button given under any one of the Pet pictures which has not been Adoptiond so far.....	47
e) Click on "Confirm" button in the Metamask .....	48

## I) Project Goal (Problem Statement)

To design, develop and verify the "Pet's Adoption Application" having the following features:

- Display the front-end on the default Browser with available Pet's for Adoption in the
- Adoption a Pet by clicking on the "Adoption" button
- Metamask should be able to calculate the transaction fees for storing the Adoption transaction in the Ganache Blockchain
- Ganache should record the Adoption transaction and it should be verifiable
- Pet once Adopted should not have the option of purchasing again
- Using one Ganache Ethereum Account the Account holder should be able to Adoption more than one Pet
- Using different Ganache Ethereum accounts, the account holder should be able to Adoption Pet's and verify the related transactions in Ganache

## II) Solution Proposed

- We will design, develop, implement and verify the Ethereum Blockchain based solution namely "Pet's Adoption Application" which will be executed in a Windows System. The proposed Solution will meet all the features specified in the Problem statement

## ABSTRACT

Purpose of this project is to design, develop and demonstrate the usage of TELEVISION PURCHASE SHOP using ETHEREUM BLOCKCHAIN having the following features:

- Download and install "METAMASK" wallet as the extension of chrome browser
- Download and install the latest version of "GANACHE ETHEREUM TEST BLOCKCHAIN"
- Link the "METAMASK" to the "first account" of the "GANACHE TEST ETHEREUM BLOCKCHAIN" and verify the quantity of ether available in Metamask's account
- Download and install NodeJS for Windows Platform20
- Verify the successful installation of "NodeJS" and "npm" through Windows terminal (using "cmd" command)
- Install Truffle through Windows terminal and verify its version after installation
- Download and Install "Visual Studio code" editor and verify
- After setting Up the Environment ,Compile,Migrate and Test METAMASK,GANACHE,NODEJS,TRUFFLE,VISUAL STUDIO CODE in windows platform and Run the Project
- Display the front-end on the default Browser with available Pets for Purchase in the Shop
- Purchase a Pet by clicking on the "Purchase" button
- Metamask should be able to calculate the transaction fees for storing the purchase transaction in the Ganache Blockchain
- Ganache should record the purchase transaction and it should be verifiable
- Pet once purchased should not have the option of purchasing again
- Using one Ganache Ethereum Account the Account holder should be able to purchase more than one Pet
- Using different Ganache Ethereum accounts, the account holder should be able to purchase Pets and verify the related transactions in Ganache

10) Query the created Forex: Click on the QUERY option, enter the created Query details and then click on "SEARCH" button..... 44

11) Query and verify the Customers (IND\_Ramu\_111 and EU\_Marcos\_999) data and note down their current account balances (for verifying the successful transfer of fund between them)..... 44

12) Query and verify the Banks (IND\_Bank and EU\_BankRamu\_111 and EU\_Bank) data and note down their current reserve amounts (for verifying the successful change in their reserves)..... 45

13) Pay 1,000 units in Indian currency (INR) from the IND\_Bank Customer "IND\_Ramu\_111" to the EU\_Bank Customer "EU\_Marcos\_999" and verify ..... 46

14) Query and Verify the Customers (IND\_Ramu\_111 and EU\_Marcos\_999) data and note down their current account balances (for verifying the successful changes in the accounts' balances) ..... 47

15) Query and verify the Banks (IND\_Bank and EU\_Bank) data and note down their current reserve amounts (for verifying the successful change in the Banks' reserves).... 48

XII) **Closing of "CBFTIG" Project** ..... 49

XIII) **Project Summary** ..... 52

## I) Project Goal (Problem Statement)

To design, develop and verify the Hyperledger Fabric based Blockchain application namely "CBFTW Application" having the following features:

- 1) Query from the Banks Network's data that is available as part of the Blockchain (Reading bulk data from the Blockchain)
- 2) Query any one of the Banks Network's data that is available as part of the Blockchain (Reading individual record or data from the Blockchain)
- 3) Add a new Bank, Customer, Forex Value data and verify that these values get added successfully into the Blockchain (Writing new records into the blockchain and its verification)
- 4) Pay from any one of the Banks' Customer Account to any other Bank's Customer Account across the available Banks in the network effectively using the applicable Forex rates without any Third-party involvement (Cross Border Funds Transfer across the World (CBFTW)). Further verifying the successful transfer of the fund across the Customer accounts.

Note: These verifications need to be done both in Command Line Interface (CLI) mode and also using browser based front-end mode.

## II) Solution Proposed

- 1) We will design, develop, implement and verify the Hyperledger Fabric based Blockchain network namely "CBFTW Application" in an Ubuntu O/S based EC2 Instance in AWS.
- 2) We will write the required Blockchain configuration and other files so as to bring-up the Blockchain network
- 3) We will write a Golang program namely "banks.go" in which we will implement the main logic of the Solution.
- 4) In the banks.go program, we will design the below given Data structures:

Pet's' Adoption Application is the project of many hands from the team. Our tribute for the successful completion of the project goes to all those who helped through their constant guidance and encouragement. The satisfaction that accompanies the success would be incomplete without thanking the person who made it.

We are thankful to our beloved Principal **Dr.B SURESHA**, who encourages us to come with new and innovative ideas and for providing the environment with all facilities for completing the project.

We are also grateful to our Head of the Department **Prof. ASHA TS** Department of computer science for her valuable guidance and constant support during our project development.

We are also grateful to our project guide **Prof. VARADARAJ R**, lecturer Department of computer science for his valuable guidance and constant support during our project development.

A special thanks to **MUTHURAM GOVINDARASU**, CEO and Founder of Indigeneous Tech Private Limited, Bangalore-32 with 10 years of experience in Blockchain for his valuable guidance and technical support for our project.

We extend our thanks to all our teaching staffs of the department of computer science. Finally, we thank one and all who helped us directly and indirectly for the completion of our project.

## **I. Introduction**

### **1. Define Project Goal, Problem Statement, Proposed Solution and Solution Steps**

#### **1.1) Project Goal**

To understand the given problem, propose a suitable solution and implement the proposed solution and verify the result.

#### **1.2) Problem Statement**

Design and develop a Regression prediction model by which we can successfully predict the Bigmart Sales values for the given customer data.

#### **1.3) Solution Proposed**

We will design and implement a Python based Regression prediction Model which will learn from the given training data and then predict the Bigmart Sales values for the provided Customer data.

#### **1.4) Solution Steps**

To design, develop and verify the "Bigmart Sales Prediction Solution" having the following features:

- a) To read, analyse, preprocess the given training dataset besides giving the Pre-processed data for using in further programs.
- b) To execute and find out the applicability of remaining Data Preprocessing tasks (Multicollinearity, Outlier data, Feature selection and Dimensionality Reduction) on the Preprocessed dataset.
- c) To execute and verify all the applicable Regression algorithms on the Preprocessed dataset and identify the most suitable Regressor out of these based on the Test/CV based accuracy values.
- d) To predict the Bigmart Sales values for the given Customer data using the finalized Regressor (from Step (c)) and writing out Customer Data file with the predicted values as one of the columns

## 2. Tools and Technologies Used

### 2.1) Tools/ Technologies Used

- O/S: Windows 10 and above 64-bit
- Browser: Chrome Browser
- Google Drive
- Colab (Google Colaboratory)
- Python Notebooks
- Python Libraries
- Regression Algorithms
- Anaconda Navigator-64 bit for windows
- VS code

**Front-end tools:** Streamlit, Python, CSS

**Back-end tools:** CSV file, Pickle file, Machine Learning Algorithms

## Introduction

### 1) Project Goal

To design, develop and demonstrate the usage of AWS EBS Demonstration using EC2 Windows Server Instances by Creating a Custom VPC, Subnets, Route Tables, etc. and Creating EC2 Windows Server Instances and EBS Volume in the just created Custom VPC and Demonstrating the EBS Demo.

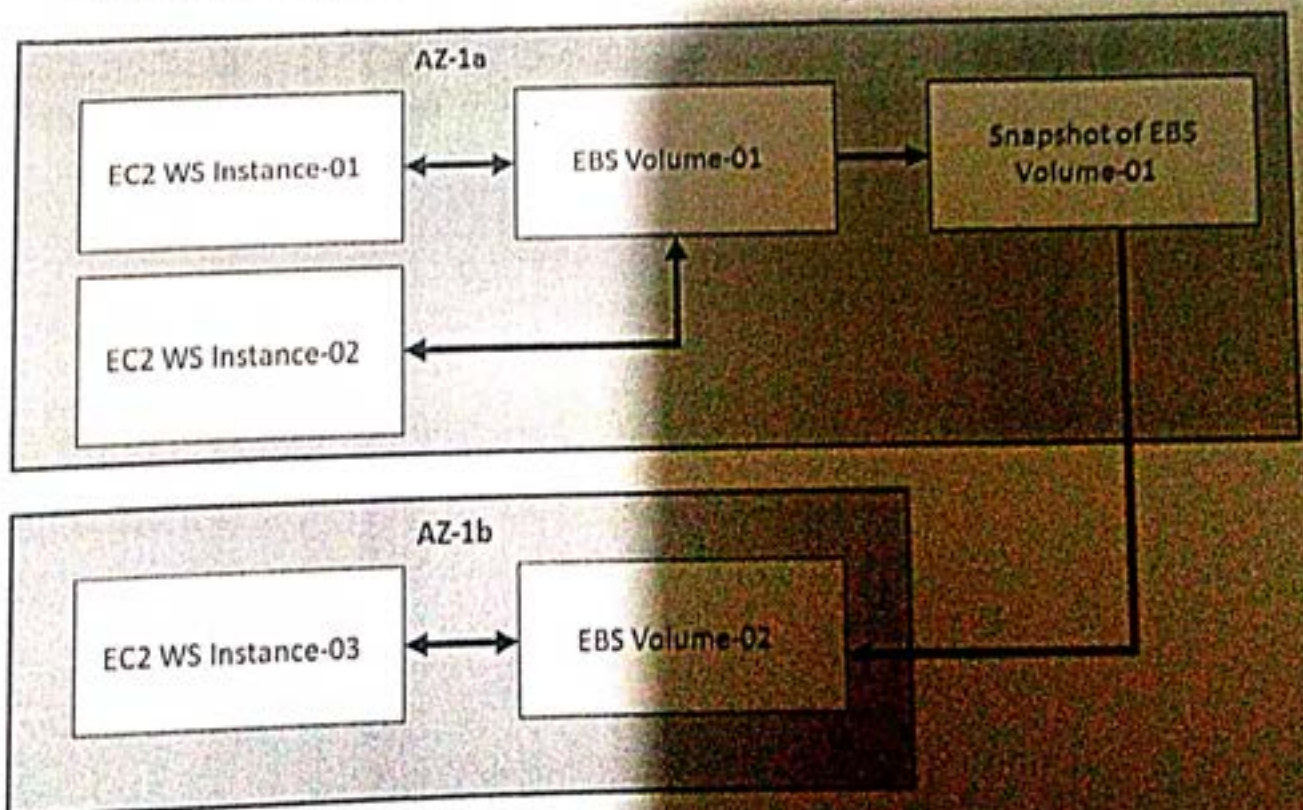

### 2) Tools / Technologies Used

Cloud Computing Amazon Web Services (AWS) Services.

- EC2 Windows Server Instances
- Custom VPC, Subnets, Route Tables etc.
- EBS Volume, Snapshots
- Remote Desktops

### 3) Solution Design

## I) Project Goal (Problem Statement)

To design, develop and verify the “eVoting for Bike Application” having the following features:

- a) Display the front-end of the Application on the default Browser
- b) Setup the “Admin” related info and start the eVoting process
- c) Add 3 bikes for eVoting

## IV) Project/ Solution (eVoting for Bikes Application)

# Block Diagram of ("eVoting for Bikes Application)

## High Level:

- 1) Create / provide the following in the Windows System:
  - a) Create and set the Ethereum Blockchain environment in the Windows system
  - b) Create the Project folders and files using "Truffle" in the Windows System
  - c) Write the Solidity program "Evoting.sol" capturing the main logic of the solution
  - d) Write the required frontend, middleware and other required files for the solution
  - e) Provide the Solution data using .JSON file

## Details:

- a) Set-up the Ethereum Blockchain environment in the Windows System by installing NodeJS, NPM, Truffle, Ganache and Metamask
- b) By using Truffle, setup the project folder and required files in the Windows System.
- c) Write a Solidity language program namely "Evoting.sol" in which we will implement the main logic of the Solution.

- d) Write the middleware program using JavaScript and Web3.js
- e) Start the Ethereum Test Blockchain "Ganache" and sign-in to the Metamask. Connect the Metamask with the Ganache Test Blockchain by importing an account
- f) We will also create a frontend (React App based) for the solution so that you can interact with the Blockchain application through your browser.

## V) Tools/ Technologies Used

- a) List of Tools and Technologies
  - O/S: Windows 10
  - Browser: Chrome Browser
  - Nodejs and NPM
  - Truffle
  - Ganache (Ethereum Test Blockchain)
  - Metamask
  - HTML
  - CSS
  - JavaScript
  - Web3.js
  - Front-end Tools:
    - HTML, CSS
    - Development Server (lite-server)
- b) Backend:
  - Ethereum based Test Blockchain linked with Metamask
- c) Middleware:
  - JavaScript with Web3.js

## VI) Install the Tools required for the Ethereum Based Blockchain Project in Windows System

(For the detailed instructions, please refer "Appendix-A" document of this Project Report)

## VII) Setup the Ethereum Blockchain for Books Application in the Windows System

(For the detailed instructions, please refer "Appendix-B" document of this Project Report)

	1) Adoption a "Pet" using the currently connected Ethereum Account	25
	a) Click on "Adoption" button given under any one of the Pet pictures	25
	b) Check on the Metamask account displayed and make sure that your recently imported account is displayed and it is loaded with 100 Ethers	26
	c) Now, click on "Adoption" button given under any one of the Pet pictures	31
	d) Verify the Metamask Wallet display (like Account Info, Estimated Gas Fee, Total Fees) and then click on "Confirm" button	31
	e) Verify that the clicked "Adoption" button is changed to "Success". The Ethereum Account info is displayed under Adoption	32

f) Verify that the Adoptionr's Ethereum account info is captured in the "List of Adoptionrs" .....	33
g) Verify the Ganache TX COUNT, Transaction and New Block Creation....	33
2) Adoption a second "Pet" with the same Ethereum Account.....	35
a) Click on "Adoption" button below any of the Pet pictures which has not been Adoptiond so far.....	35
b) Verify the Metamask Wallet display (like Account Info, Estimated Gas Fee, Total Fees) and then click on "Confirm" button .....	36
c) Verify that the "Adoption" button has changed into "Success" and the "Adoptionr" Account address is getting displayed below the picture of Adoptiond Pet. Also, verify that the Adoptionr's Ethereum account info is captured in the "List of Adoptionrs".....	37
d) Verify the Ganache TX COUNT, Transaction and New Block Creation....	38
3) Adoption a "Pet" with the another Ethereum Account .....	39
a) Copy the Private key of the Second Ethereum account in Ganache .....	39
b) Select the "Ganache Network" in the Metamask, import an account, paste the just copied Private Key and click on "Confirm" button .....	40
c) Connect the imported account to the "Ganache Test Blockchain and verify.....	43
d) Click on "Adoption" button given under any one of the Pet pictures which has not been Adoptiond so far.....	47
e) Click on "Confirm" button in the Metamask .....	48
f) Verify that the "Adoption" button has changed into "Success" and the current "Adoptionr" Account address is getting displayed below the picture of Adoptiond Pet. Also, verify that the Adoptionr's Ethereum account info is captured in the "List of Adoptionrs".....	49
g) Verify the Ganache TX COUNT, Transaction and New Block Creation....	49
<b>XIII) Project Summary</b> .....	51

## I) Project Goal (Problem Statement)

To design, develop and verify the "Pet's Adoption Application" having the following features:

- Display the front-end on the default Browser with available Pet's for Adoption in the
- Adoption a Pet by clicking on the "Adoption" button
- Metamask should be able to calculate the transaction fees for storing the Adoption transaction in the Ganache Blockchain
- Ganache should record the Adoption transaction and it should be verifiable
- Pet once Adopted should not have the option of purchasing again
- Using one Ganache Ethereum Account the Account holder should be able to Adoption more than one Pet
- Using different Ganache Ethereum accounts, the account holder should be able to Adoption Pet's and verify the related transactions in Ganache

## II) Solution Proposed

- We will design, develop, implement and verify the Ethereum Blockchain based solution namely "Pet's Adoption Application" which will be executed in a Windows System. The proposed Solution will meet all the features specified in the Problem statement

## III) Input Data and Images

**High Level:**

- 1) Create / provide the following in the Windows System:
  - a) Create and set the Ethereum Blockchain environment in the Windows system
  - b) Create the Project folders and files using "Truffle" in the Windows System
  - c) Write the Solidity program "Pet'sAdoption.sol" capturing the main logic of the solution
  - d) Write the required frontend, middleware and other required files for the solution
  - e) Provide the Solution data using .JSON file
  - f) Place the required Pet's' image files in the appropriate Folder

**Details:**

- a) Set-up the Ethereum Blockchain environment in the Windows System by installing NodeJS, NPM, Truffle, Ganache and Metamask

**(For the above given Step (a), please refer the Document at "Appendix-A" to this report)**

- b) By using Truffle, setup the project folder and required files in the Windows System.

**(For the above given Step (b), please refer the Document at "Appendix-B" to this report)**

- c) Write a Solidity language program namely "Pet'sAdoption.sol" in which we will implement the main logic of the Solution.
- d) Write the middleware program using JavaScript and Web3.js
- e) Start the Ethereum Test Blockchain "Ganache" and sign-in to the Metamask. Connect the metmask with two accounts of the Ganache Test Blockchain
- f) We will also create a frontend (HTML and CSS based) for the solution so that you can interact with the Blockchain application through your browser.

## ACKNOWLEDGEMENT

eVoting for Bikes is the project of many hands from the team. Our tribute for the successful completion of the project goes to all those who helped through their constant guidance and encouragement. The satisfaction that accompanies the success would be incomplete without thanking person who made it.

We are thankful to our beloved Principal **Dr. B SURESHA**, who encourages us to come with new and innovative ideas and for providing the environment with all facilities for completing the project.

We are also grateful to our Head of the Department **Prof. ASHA TS** Department of computer science for her valuable guidance and constant support during our project development.

We are also grateful to our project guide **Prof. VARADARAJ R**, lecturer Department of computer science for his valuable guidance and constant support during our project development.

We are also grateful to **MUTHURAM GOVINDARASU** CEO and Founder of Indigeneous Tech Private Limited, Bangalore-32 with vast years of experience in Blockchain for his valuable guidance and technical support for our project.

We extend our thanks to all our teaching staffs of department of computer science. Finally, we thank one and all who helped us directly and indirectly for the completion of our project.

## **Annexure A**

You shall be governed by the following terms and conditions of service during your internship with Calaver, and those may be amended from time to time.

1. You will be working on-site (in our HSR, Bangalore Office) for the duration of the internship. There will be catch-ups scheduled with your mentor to discuss work progress and overall internship experience at regular intervals.
2. All the work that you will produce at or in relation to Calaver will be the intellectual property of Calaver. You are not allowed to store, copy, sell, share, and distribute it to a third party under any circumstances. Similarly, you are expected to refrain from talking about your work in public domains (both online such as blogging, social networking sites, and offline among your friends, college, etc.) without prior discussion and approval with your mentor.
3. We take data privacy and security very seriously and maintaining the confidentiality of any students, customers, clients, and companies' data and contact details that you may get access to during your internship will be your responsibility. Calaver operates on a zero-tolerance principle with regard to any

# Calaver Technologies Pvt.Ltd

breach of data security guidelines. At the completion of the internship, you are expected to hand over all Calaver work/data stored on your Personal Computer to your mentor and delete the same from your machine.

4. During the appointment period, you shall not engage yourselves directly or indirectly or in any capacity in any other organization (other than your college). In the event of a breach of this condition, this appointment is liable to be terminated forthwith by the company.

5. Under normal circumstances, either the company or you may terminate this association by providing a notice of 30 days without assigning any reason. However, the company may terminate this agreement forthwith under situations of in-disciplinary behaviors.

6. Calaver is a start-up and we love people who like to go beyond the normal call of duty and can think out of the box. Surprise us with your passion, intelligence, creativity, and hard work – and expect appreciation & rewards to follow.

7. Expect constant and continuous objective feedback from your mentor and other team members and we encourage you to ask for and provide feedback at every possible opportunity. It's your right to receive and give feedback – this is the ONLY way we all can continuously push ourselves to do better.

8. Have fun at what you do and do the right thing – both the principles are the core of what Calaver stands for and we expect you to imbibe them in your day-to-day actions and continuously challenge us if we are falling short of expectations on either of them.

9. You will be provided ₹25,000 per month as a stipend. All the office-related expenses (phone calls, internet, etc., if any) would be reimbursed on an actual basis.

### Internship Certificate

*To whom it may concern*

This is to certify that **Rohit BC** has completed an internship with us in the data science department from 23rd March 2023 to 31st July 2023.

Throughout his tenure, Rohit showcased an exceptional ability to grasp and apply new technologies rapidly. His intrinsic motivation was evident in the manner he sought out and immersed himself in cutting-edge data science tools and methodologies. This drive was further exemplified by his proactive approach to initiating and completing projects with minimal supervision. Whether it was in a collaborative setting or an individual project, Rohit demonstrated commitment, creativity, and an exemplary level of autonomy.

Given Rohit's zeal for technological exploration and his ability to drive projects to fruition independently, we wholeheartedly believe he will make significant contributions to the field of data science. We enthusiastically recommend him for any future roles or challenges.

Dear Professor

It is with great pleasure that I inform you that the Semester IV at St. Joseph's (Autonomous) College, PG Section will be coming to a completion shortly. You've been an important part of our activities by guiding our students with their project for nearly a year's time. I take this opportunity to thank you for the help you have extended to St. Joseph's and appreciate all the kindness that you've shown us.

As you were the supervisor to **Deepak Raja S (20PHY04)** and **Mathew J Mathews (20PHY15)** project, we will require one more help from you in the form of grading them.

The total grade is for 100 points of which **50 points** is delegated for internal work and will be graded by **you** (the various heads each carrying 10 points can be: Passion, Hard work/commitment, Understanding/cognition, Communication, Regularity of meeting you/meeting the deadlines you have imposed - these heads are loose and perhaps merge between themselves; please feel free to alter them as you deem fit).

The balance of 50 points will be external and be graded by us at the Department of Physics, St. Joseph's college. These grades will go for their project presentations.

**You are cordially invited to our department for the Project Presentation event.** The event is scheduled for the **4<sup>th</sup> of August 2022, 10:00 am**. The presentations will go on **till 4:00 PM** and refreshments and lunch will be provided.

**Please confirm your presence by 1<sup>st</sup> of August, 2022 midday so we can make arrangements for the food.**

Thanks, and regards

Dear Adithya Parashar K C,

We would like to congratulate you on being selected for the **Trainee Software Engineer** Internship position with **Renalyx Health Systems Pvt. Ltd, Bengaluru**, effective from March 10, 2021. This internship will be duration of 4 months.

As we discussed during the interview process, this is a non-paid internship.

This internship is viewed by the organization as being an opportunity for you to learn and explore yourself as academic project, rather than a part-time job. As such, your internship will include training/orientation and focus primarily on learning and developing new skills and gaining a deeper understanding of concepts through hands-on application of the knowledge you learned already.

During the internship period you will be accessible for the confidential resources or the documents of the organization. By accepting this offer, you should adhere to the policies and confidentiality of the organization. You are not supposed to disclose any of this confidential resources with the outside world.

You will be working for a project entitled "**Patient disease management system**" and place of work will be in the Bengaluru location. You will be reporting to the head of software team.

You will be issued letter after successful completion of internship. But this letter will not guarantee any employment in Renalyx.

Again, congratulations and we look forward to working with you.

Mr. Adithya Parashar K C  
Department of Computer Science,  
National College (Autonomous),  
7<sup>th</sup> Block, Jayanagar, Bengaluru - 70

Dear Adithya Parashar K C,

We would like to congratulate you on being selected for the **Trainee Software Engineer** Internship position with **Renalyx Health Systems Pvt. Ltd, Bengaluru**, effective from March 10, 2021. This internship will be duration of 4 months.

As we discussed during the interview process, this is a non-paid internship.

This internship is viewed by the organization as being an opportunity for you to learn and explore yourself as academic project, rather than a part-time job. As such, your internship will include training/orientation and focus primarily on learning and developing new skills and gaining a deeper understanding of concepts through hands-on application of the knowledge you learned already.

During the internship period you will be accessible for the confidential resources or the documents of the organization. By accepting this offer, you should adhere to the policies and confidentiality of the organization. You are not supposed to disclose any of this confidential resources with the outside world.

You will be working for a project entitled "**Patient disease management system**" and place of work will be in the Bengaluru location. You will be reporting to the head of software team.

You will be issued letter after successful completion of internship. But this letter will not guarantee any employment in Renalyx.

Again, congratulations and we look forward to working with you.

With Best Wishes

This internship is viewed by the organization as being an opportunity for you to learn and explore yourself as academic project, rather than a part-time job. As such, your internship will include training/orientation and focus primarily on learning and developing new skills and gaining a deeper understanding of concepts through hands-on application of the knowledge you learned already.

During the internship period you will be accessible for the confidential resources or the documents of the organization. By accepting this offer, you should adhere to the policies and confidentiality of the organization. You are not supposed to disclose any of this confidential resources with the outside world.

You will be working for a project entitled "**Patient disease management system**" and place of work will be in the Bengaluru location. You will be reporting to the head of software team.

You will be issued letter after successful completion of internship. But this letter will not guarantee any employment in Renalyx.

Again, congratulations and we look forward to working with you.
