

A Report on An Awareness Programme on River Rejuvenation

The IQAC of the college has organized an **Awareness programme on River Rejuvenation** on **13th July, 2022** between **3 PM to 5PM** to enhance the participation of youth in rejuvenation of rivers. The resource person was **Ms. Vinutha**, a Faculty Research Assistant in Sri Sri Institute for Advanced Research. The resource person emphasized that the issues like reduced water flow in rivers, soil erosion and deforestation have led to the poor health of the rivers which is reflected in both the quality and quantity of water which in turn affects livelihood, public health and aquatic system. She asserted that small change could bring big results and encouraged the students to take up socially relevant and viable projects. She urged that efficient water recycling and reusing approaches must be adopted.
